

The Campaign for Colorado State University
COLLEGE OF APPLIED HUMAN SCIENCES

Early Childhood Center
Human Development and Family Studies

Gift Opportunity - \$1,000,000 - \$6,000,000

Are children your passion?

A special opportunity exists to help make possible a new home for the Early Childhood Center. A quality resource for children in the community for the last eighty years, the program is challenged by space limitations, dated facilities, and research/technology constraints in its current location in the Gifford Building, where the program has been housed since 1976.

The lab school is greatly in need of a new facility to continue its three part mission:

- Serving the needs of children and their families in an enriched environment
- Preparing students for a career working with children
- Providing opportunities for research related to early childhood education

Your gift may name or help sustain a new Early Childhood Center where faculty, staff, and students can continue to provide meaningful educational experiences in a caring atmosphere for children and families in the community.

Renovation of an existing space on or near campus may be accomplished for \$1 million. Constructing a new facility is expected to cost up to \$6 million.
